

Overview

Web Developer specializing in front end development. Experienced with all stages of the development cycle for dynamic web projects. Versed in programming languages such as **HTML5, CSS, SCSS TypeScript, JavaScript**. Source code: <https://github.com/gfouz>

Standards and rules.

- Typescript
- BEM (Block element modifier) as css architecture .
- Eslint for JavaScript and Typescript code.
- Vitest and react-testing-library for testing components.

Experience

Cuantico: Node js fullstack.

I worked in the first phase of a system to generate digital certificates for Segurmática which is the information security company in Cuba. I participated in the creation or abstraction of the database in this case relational using PostgreSQL and Sequelize as ORM. As well as designed the Rest Api of routes and controllers with Express and Node. I used React for client side rendering, this system has great importance for the development of digital certification in Cuba.
